🔗 [LeetCode](#)

SUMMARY

ServiceNow CSA and CAD certified B.Tech CSE student with hands-on experience in JavaScript and Python development. Skilled in ITSM modules, client scripts, workflows, business rules, and ServiceNow platform administration. Practical exposure to ML automation pipelines and computer vision applications during the JOVAC Data Science internship.

Skills

Languages: C++, HTML, CSS, JavaScript, SQL

ServiceNow Platform: Incident, Problem, Change & Request Management, User & Role Administration, Forms & Lists, UI Policies, Business Rules, Client Scripts, Workflows, Notifications, SLAs, Service Catalog, Update Sets

Libraries & Frameworks : ServiceNow Glide API, Service Portal Framework, Scikit-learn, NumPy, Pandas

Training and Internships

Certified System Administrator | **ServiceNow - Remote**

Nov 2025 -Jan 2026

- Managed ITSM modules (Incident, Problem, Change, Request) with end-to-end ticket lifecycle and SLA monitoring.
- Administered users, roles, groups, and ACLs to ensure secure access control.
- Configured workflows, notifications, SLAs, and reports to improve service efficiency.

Certified Application Developer | **ServiceNow - Remote**

Nov 2025 -Jan 2026

- Developed custom scoped applications using Application Studio, tables, and forms.
- Implemented Business Rules, Script Includes, Client Scripts, UI Actions, and Flow Designer.
- Integrated REST APIs and optimized server-side scripts for performance and reliability.

Advanced Data Science Intern | **JOVAC - GLA University**

June 2024 -July 2024

- Worked with real-world datasets for data preprocessing, cleaning, and preparation for machine learning models.
- Performed basic data analysis to understand patterns and support model development.
- Used image annotation tools such as CVAT, LabelImg, and Roboflow to label image datasets and manage annotated data.
- Ensured annotation accuracy and consistency by following defined guidelines and reviewing labeled data.

Education

GLA University, Mathura

Aug 2022 - May 2026

B.Tech in Computer Science Engineering (Artificial Intelligence & Machine Learning)

Relevant Coursework: Object-Oriented Design, Relational Databases, Data Structures, Algorithms, Operating Systems, Computer Networks, Machine Learning

Project Work

Automated Visual Quality Control for Manufacturing [Link](#)

- Designed and developed a computer vision-based defect detection system using image processing techniques, improving inspection accuracy by 30–40%.
- Implemented feature extraction and image preprocessing (grayscale conversion, edge detection, contour analysis) using OpenCV, and evaluated machine learning classification models in Scikit-learn to identify defective vs. non-defective components, achieving 85%+ accuracy.
- **Tech Stack:**Python, OpenCV, Scikit-learn, NumPy, Pandas, Image Processing, Computer Vision, Machine Learning

Achievements and Certificates

- Achieved **ServiceNow Certified System Administrator** [View Credential](#)
- Achieved **ServiceNow Certified Application Developer** [View Credential](#)
- Achieved **Advanced Data Science Internship (JOVAC, GLA University)** [View Credential](#)
- Achieved **HackerRank Software Engineer Intern Certification** [View Credential](#)
